Geography 205
Developing your Final Project

1. List three subjects in which you are interested:
   examples: biology, criminal justice, football

2. Develop a spatial question for each subject:
   examples: Where are the best locations in the Mojave Desert for rattlesnakes? Are violent crimes in Lancaster located near liquor stores? Do local college football victories the weekend before an election give an incumbent a 1.6% point boost as reported in Psychology Today?

3. Select your favorite of the three and list the data you would need to successfully answer your spatial question:
   examples: Lancaster crimes, liquor stores, Lancaster streets, Lancaster city boundaries
